

REVACOM COMPACT (1)

revacom
change smart

Put your trust in a capable partner.

As one of Europe's leading suppliers of application packaging, we can take care of the numerous time-consuming and complicated processes involved in a software upgrade of this kind. We think of everything, from obtaining the initial information to delivering the finished product.

As an IT service-provider, working with Revacom will give you an invaluable competitive edge. We set the standards in terms of efficiency, largely thanks to our reliable nearshoring model based in Ukraine, which not only saves time and money, but also guarantees excellent quality, flexibility and transparency.

We are always contactable, keep you informed at all times and are happy to incorporate your specific requests and suggestions. To us, this is what being customer-focussed is all about.

And it goes without saying that we think ahead, are early adopters of new technologies, such as software virtualisation, and are constantly finding new solutions to benefit our customers.

We enjoy what we do and we do it well. It's not all about efficiency and profit. We are also responsible as a partner not only to our customers, but also to our employees and the general public. We feel being smart is about combining economic and social thinking. About being efficient without compromising on sustainability and reliability.

We invest in the professional development of our employees, give them space to come up with new ideas, reward good performance and promote an atmosphere of respect. Quite simply, teamwork is incredibly important to use at Revacom – we are convinced that success can only be achieved as a team.

REVACOM COMPACT (2)

We primarily work with professional IT service-providers whose customers are themselves leading companies in the automotive, aviation, financial services, telecommunications, pharmaceuticals and consumer goods sectors.
